

Day 1 – Assignment C#.NET

1. Write a C# Sharp program that prints the multiplication table of a number as input.
Test Data:
Enter the number: 5
Expected Output:
5 * 0 = 0
5 * 1 = 5
5 * 2 = 10
5 * 3 = 15
....
5 * 10 = 50
2. Write a C# program that takes a number as input and displays it four times in a row (separated by blank spaces), and then four times in the next row, with no separation. You should do it twice: Use the console. Write and use {0}.
Test Data:
Enter a digit: 25
Expected Output:
25 25 25 25
25252525
25 25 25 25
25252525
3. Write a C# program to convert Celsius degrees to Kelvin and Fahrenheit.
Test Data:
Enter the amount of celsius: 30
Expected Output:
Kelvin = 303
Fahrenheit = 86
4. Write a C# program to find the longest word in a string.
Test Data: Write a C# Sharp Program to display the following pattern using the alphabet.
Sample Output:
following
5. Write a C# program to create a string where the first 4 characters are in lower case. If the string is less than 4 letters, make the whole string in upper case.
Test Data:
Input a string: w3r
Sample Output
W3R

NOTE : Create above programs and submit codes along with screen shot of output obtained.
