Day 2 – Assignment C#.NET

1. Write a C# Sharp program that takes userid and password as input (string type). After 3 unsuccessful attempts, the user will be rejected.
2. Write a C# program to rotate an array (length 3) of integers in the left direction.

Test Data:

Array1: [1, 2, 8]

After rotating array becomes: [2, 8, 1]

3. Write a C# Sharp program to determine the eligibility for admission to a professional course based on the following criteria:

Marks in Maths ≥ 65

Marks in Phy ≥ 55

Marks in Chem ≥ 50

Total in all three subject ≥ 180

or

Total in Math and Subjects ≥ 140

Test Data :

Input the marks obtained in Physics :65

Input the marks obtained in Chemistry :51

Input the marks obtained in Mathematics :72

Expected Output :

The candidate is eligible for admission.

4. Write a C# Sharp program to calculate and print the electricity bill of a customer. From the keyboard, the customer's name, ID, and unit consumed should be taken and displayed along with the total amount due.

The charge are as follow :

Unit	Charge/unit
upto 199	@1.20
200 and above but less than 400	@1.50
400 and above but less than 600	@1.80
600 and above	@2.00

If bill exceeds Rs. 400 then a surcharge of 15% will be charged and the minimum bill should be of Rs. 100/-

Test Data :

1001

James

800

Expected Output :

Customer IDNO :1001

Customer Name :James

unit Consumed :800

Amount Charges @Rs. 2.00 per unit : 1600.00

Surcharge Amount : 240.00

Net Amount Paid By the Customer : 1840.00

5. Write a program in C# Sharp which is a menu-driven program to perform simple calculations.

Test Date and Expected Output

Enter the first Integer :10

Enter the second Integer :2

Here are the options :

1-Addition.

2-Subtraction.

3-Multiplication.

4-Division.

5-Exit.

Input your choice :3

The Multiplication of 10 and 2 is: 20

6. Write a C# program to rotate an array (length 3) of integers in the left direction.

Test Data:

Array1: [1, 2, 8]

Expected Output :

After rotating array becomes: [2, 8, 1]

7. Write a C# Sharp program to count the number of vowels or consonants in a string.

Test Data :

Input the string : Welcome to w3resource.com

Expected Output :

The total number of vowel in the string is : 9

The total number of consonant in the string is : 12

8. Write a program in C# Sharp to create a function to calculate the result of raising an integer number to another.

Test Data :

Input Base number: 3

Input the Exponent : 2

Expected Output :

So, the number 3^2 (to the power) 2 = 9

9. Write a C# Sharp program to calculate each city's square area based on the given area of some cities in the United States.

Expected Output:

City	Area (mi.)	Equivalent to a square with:
Sitka, Alaska	2,870.3	53.58 miles per side
New York City	302.6	17.40 miles per side
Los Angeles	468.7	21.65 miles per side
Detroit	138.8	11.78 miles per side
Chicago	227.1	15.07 miles per side
San Diego	325.2	18.03 miles per side

Free, Open-Source, Cross-Platform Framework

10. Write a C# Sharp program to convert a given integer value to Roman numerals.

Expected Output:

Original integer value: 2365

Roman numerals of the said integer value:

MMCCCLXV

Original integer value: 254

Roman numerals of the said integer value:

CCLIV

Original integer value: 45

Roman numerals of the said integer value:

XLV

Original integer value: 8

Roman numerals of the said integer value:

VIII

NOTE: Create above programs and submit codes along with screen shot of output obtained.

Debug your doubts, deploy your success
