

Angular a Web Framework

Web Framework: Crafted for Users, Powered by Google

Working With Custom Pipes

Create Custom Pipes:

1. Display employee performance as
 - $\geq 0.90 \rightarrow$ 'Excellent'
 - $\geq 0.75 \rightarrow$ 'Good'
 - $\geq 0.60 \rightarrow$ 'Average'
 - Rest $\rightarrow$ Poor
2. Employee Status
 - A = Active
 - I = Inactive
 - L = On Leave
3. Kebab Case Transform
 - Emp List Filter $\rightarrow$ emp-list-filter
4. Masking Phone Number
 - Suppose ph no received as '9876543210'
you need to return 98765*****
5. Salary transformed in LPA
 - 750000 $\rightarrow$ ₹ 7.5 LPA
 - 1200000 $\rightarrow$ ₹ 12.5 LPA
 - 45000 $\rightarrow$ ₹ 4.5 LPA
6. Search/Filter
 - Create a pipe that filters employees.0

```
src/app/
|
├── employees/
│   ├── employee-list/
│   │   ├── employee-list.ts
│   │   └── employee-list.html
│   └── employee.model.ts
├── pipes/
│   ├── performance.pipe.ts
│   ├── employee-status.pipe.ts
│   ├── mask-phone.pipe.ts
│   └── employee-filter.pipe.ts
├── services/
│   └── employee.service.ts
├── app.component.ts
├── app.routes.ts
└── app.config.ts
```
