Week 2 Assignment: IMS Sample Data

Sample Customers

```
private static List<Customer> customers = new()
```

```
{
```

```
    new Customer
```

```
    {
```

```
        CustomerId = 1,
```

```
        FullName = "Rahul Sharma",
```

```
        Email = "rahul.sharma@gmail.com",
```

```
        Phone = "9876543210",
```

```
        DOB = new DateTime(1992, 5, 10),
```

```
        City = "Delhi",
```

```
        State = "Delhi",
```

```
        IsActive = true
```

```
    },
```

```
    new Customer
```

```
    {
```

```
        CustomerId = 2,
```

```
        FullName = "Sneha Verma",
```

```
        Email = "sneha.verma@gmail.com",
```

```
        Phone = "9876543211",
```

```
        DOB = new DateTime(1990, 8, 20),
```

```
        City = "Hyderabad",
```

```
        State = "Telangana",
```

}  
  
};
```

Relationship Diagram

Customer

1 Rahul Sharma

|
+-- Policy 1 (Health)
|
+-- Claim 1 (Approved)
|
+-- Claim 4 (Pending)

2 Sneha Verma

|
+-- Policy 2 (Motor)
|
+-- Claim 2 (Pending)

3 Amit Kumar

|

Microsoft DotNet

Free, Open-Source, Cross-Platform Framework

+-- Policy 3 (Life)

|

+-- Claim 3 (Rejected)

4 Priya Nair

|

+-- Policy 4 (Health - Cancelled)

5 Vikram Singh

|

+-- Policy 5 (Motor)

|

+-- Claim 5 (Approved)

Expected Dashboard Output

Based on the sample data:

Metric	Value
--------	-------

Total Customers	5
-----------------	---

Active Customers	4
------------------	---

Inactive Customers	1
--------------------	---

Total Policies	5
----------------	---

Active Policies	4
-----------------	---

Cancelled Policies	1
--------------------	---

Microsoft DotNet

Free, Open-Source, Cross-Platform Framework

Metric	Value
--------	-------

Total Claims	5
--------------	---

Approved Claims	2
-----------------	---

Pending Claims	2
----------------	---

Rejected Claims	1
-----------------	---

This sample dataset is intentionally designed to exercise all the business rules in your assignment. It includes:

- Multiple customers with different cities and active/inactive statuses.
- Different policy types (Health, Motor, and Life).
- Both active and cancelled policies.
- Approved, pending, and rejected claims.
- A customer with multiple claims on the same policy.
- Data that allows trainees to test scenarios such as preventing deletion of customers with policies, preventing deletion of policies with claims, retrieving policies by customer, retrieving claims by policy, and validating claim approval and rejection workflows.
